

School Health Assessment Program Report

1. Introduction

The School Health Assessment Program is an essential initiative aimed at promoting the physical, mental, and social well-being of school-aged children. Conducted by the Department of Community Health Nursing, this program was implemented in [Name of School], [Location], on [Date], involving active participation from nursing students. The primary objective of the program was early detection of health issues, health education, and referral for further management, if needed.

2. Assessment of the School

Before the implementation of the program, an assessment of the school environment and infrastructure was carried out. Key areas assessed included:

- Total number of students and classes
- Sanitation and hygiene facilities
- Drinking water availability and safety
- Classroom ventilation and seating
- Playground and recreational facilities
- Presence of first-aid and health records

This baseline data guided the planning of targeted health interventions.

3. Planning of the Program

A structured plan was developed by the faculty and nursing students, which included:

- Coordination with school authorities and securing permission
- Orientation of students and parents
- Division of students into age-specific groups for screening
- Preparation of tools for health screening (forms, equipment, checklists)
- Arrangement of referral and counseling support
- Planning educational activities (health talks, posters, demonstrations)

4. Execution of the Program

The health assessment was carried out in the school premises under supervision. The key activities included:

- Registration of students
- Systematic health screening by nursing students
- Individual health records prepared for each student
- Health education sessions on hygiene, nutrition, and mental health
- Referral of students with abnormal findings to nearby healthcare facilities

5. Role of Nursing Students

Nursing students actively participated in:

- Preparing screening tools and checklists
- Conducting physical examination and health interviews
- Identifying risk factors and documenting findings
- Providing health education and counseling
- Preparing reports and participating in post-program evaluation

This experience provided students with real-world exposure to school health nursing, community interaction, and interprofessional collaboration.

6. Health Screening Components

The health screening included the following components:

- General Physical Examination
- Anthropometric Assessment (Height, Weight, BMI)
- Vision Screening
- Dental and Oral Health Check
- Skin and Hair Examination
- Nutritional Status
- Personal Hygiene Assessment
- Mental Health Observation
- Immunization Check (verifying vaccination card if available)

7. Sample Health Assessment Data Set

SR NO	STD	NAME OF STUDENT	AGE (YRS)	HEIGHT (CM)	WEIGHT (KG)	STUNTING (%)	WASTING (%)	STUNTING REMARKS	WASTING REMARKS	OTHER REMARKS
1	IV	Riya Patel	9	122	21	-2.3 SD	-1.8 SD	Moderate Stunting	Normal Wasting	Needs vision screening
2	V	Aarav Mehta	10	125	19	-2.9 SD	-2.4 SD	Severe Stunting	Moderate Wasting	Pale appearance, possible anemia

Note: You can expand this dataset based on the number of students screened.

The Common Problems Identified Among the School Children Are as Follows:

Sr. No.	Condition	Frequency	Percentage (%)
1	Dental Caries	18	36%
2	Poor Personal Hygiene	15	30%
3	Undernutrition (Stunting/Wasting)	12	24%
4	Vision Problems	8	16%
5	Skin Infections (Scabies/Rashes)	5	10%

8. Outcome of the School Health Program

- Total number of students screened: [Number]
- Number of students referred: [Number]
- Common health issues identified: [e.g., dental caries, vision defects, undernutrition]
- Improvement in student awareness of hygiene and nutrition
- Positive feedback from school staff and parents
- Nursing students gained practical experience and communication skills

9. Conclusion and Summary

- Summary of achievements against objectives
- Reflection on the importance of early screening
- Limitations, if any
- Recommendations for future school health programs
- Overall learning experience for nursing students

EVALUATION CRITERIA OF SCHOOL HEALTH PROGRAMME

Name of the student:

Name of the evaluator:

Student ID No.

Date of submission:

Sr. No.	Criteria Component	Max Marks	Marks Allotted
1	Introduction Clear background, rationale, and basic event details	5	
2	School Assessment Coverage of environmental, hygiene, and health infrastructure	5	
3	Planning and Preparation Detailed planning steps, teamwork, resource readiness	10	
4	Execution Process Logical flow, student participation, handling of real-time activities	10	
5	Role of Nursing Students Clarity and extent of student involvement and learning	5	
6	Health Screening Components Appropriateness and completeness of screening activities	5	
7	Assessment Data Presentation Table clarity, accuracy, relevance, and interpretation	5	
8	Outcome Reporting Reflection of results, referrals, feedback, and impact	5	
9	Conclusion and Summary Meaningful synthesis of findings and key learning takeaways	5	
	Total	55
